

ALESIA CHERNIKOVA

Postdoctoral Research Associate, Northeastern University, Boston, USA
chernikova.a@northeastern.edu — 1-781-350-0139 — www.linkedin.com/in/alesia-chernikova — achernikova.github.io

RESEARCH INTERESTS

Responsible AI, network science, Bayesian machine learning, deep learning, mathematical modeling, epidemiology, and network robustness.

EDUCATION

Northeastern University, Boston, USA 09/2017 — 04/2024
Doctor of Philosophy in Computer Science GPA: 3.9/4.00
Advisor: Prof. Alina Oprea

Belarusian State University, Minsk, Belarus 09/2009 — 06/2014
Bachelor of Science in Applied Mathematics GPA: 3.8/4.00
Advisor: Prof. Vladimir Malugin
Thesis: "Development of risk management algorithms based on derivatives contracts."

ACADEMIC EXPERIENCE

Northeastern University, RADLAB Boston, USA
Postdoctoral Research Associate 05/2024 — Present

- Working on Trustworthy Network Science and cybersecurity of GenAI ecosystems.

Northeastern University, NDS2 Lab Boston, USA
Research Assistant 09/2017 — 04/2024

- Proposed a new compartmental model of epidemiology to represent self-propagating malware (SPM) propagation in networks using real-world WannaCry traces. Rigorously studied the characteristics of the SPM propagation process under the homogeneous mixing assumption and on arbitrary networks.
- Proposed new defense algorithms leveraging spectral graph theory and extensively tested the behavior of existing defense techniques to improve the network robustness of large enterprise networks in the face of SPM.
- Proposed a new framework for evasion attack algorithms that preserve possible feature dependencies to evaluate the robustness of deep learning models in constrained environments such as cybersecurity or healthcare. Evaluated the success of existing defense algorithms against proposed attack methodology.
- Demonstrated first evasion attacks against classification and regression deep learning models in the domain of self-driving cars.

Amazon Web Services (AWS) Boston, USA
Research Scientist Intern 05/2020 — 08/2020, 05/2021 — 09/2021

- Collaborated with project manager and senior research scientists to identify AWS customer needs, proposed directions of possible research questions to address them, and described the relevant methodologies to solve the research questions.
- Created a scalable algorithm for tracing the activity in the AWS cloud represented as a heterogeneous graph to allow further research based on AWS cloud activity data.
- Proposed and implemented the methodology for lateral movement detection in the AWS cloud environment using Bayesian statistics and network science perspectives.
- Designed experiments and analyzed data to evaluate the effectiveness of developed methodologies utilizing Scala, Spark, GraphX, and MLib.

Belarusian State University (BSU) Minsk, Belarus
Undergraduate Research Assistant 01/2012 — 12/2013

- Collaborated with a team of 9 people, including professors, post-doctoral, graduate, and undergraduate students, and a scientist from the National Bank of the Republic of Belarus in a research project on the estimation and evaluation of credit rankings of national enterprises using their real-world financial data.
- Participated in creating the methodology for credit rankings estimation using mathematical, statistical, and econometric methods and models.
- Independently achieved and managed the project results for the building enterprise section.
- Collaborated in developing the package for automated calculation of credit scores based on the proposed credit rankings evaluation methodology.

TEACHING EXPERIENCE

Northeastern University Boston, USA
Teaching Assistant for CS4100: Artificial Intelligence 09/2022 — 12/2022, 09/2023 — 12/2023, 01/2023 — 04/2024

- Designed and held lectures for undergraduate and graduate students.
- Held weekly office hours to answer questions, provide support, and review course material. Led discussions and answered questions to ensure students thoroughly understood the material.
- Graded assignments, exams, and research projects for a class of 90+ students.
- Assisted professor with homework and exam preparation, proctored the exams.
- Advised students regarding research projects.

PROFESSIONAL EXPERIENCE

IBA Group Minsk, Belarus
Senior Software Engineer 11/2013 — 07/2017

- Participated in the development of a large-scale IBM GSAR web portal.
- Tested software for bugs, fixed them, and maintained the portal's performance.
- Assisted the software architect with the efficiency and usability improvement of the portal.

AWARDS

IEEE S&P and GREPSEC Travel Grant 2019

Khoury College of Computer Science Fellowship 2017 — 2018

National Bank of the Republic of Belarus Merit Scholarship 2013 — 2014

Belarusian State University Excellence Merit Scholarship 2012 — 2014

SKILLS

- **Programming:** Python, Java, Scala, Javascript, C/C++
- **Frameworks and Libraries:** PyTorch, Tensorflow, Keras, Spark

SELECTED COURSES

Advanced Machine Learning (Bayesian methods for probabilistic modeling and inference), Data Visualization, Machine Learning, Advanced Algorithms, Data Mining (Unsupervised Learning), Distributed Systems, Theory of Probabilities and Mathematical Statistics, Methods of Optimization, Multivariate Statistical Analysis, Mathematical Theory of Forecasting, Discrete Mathematics and Graph Theory, Differential Equations, Matrix Analysis, Real and Complex Analysis, Algorithms and Data Structures, Game Theory, Macroeconomics, Microeconomics, Social Theory, Philosophy.
